

S1000D Training

Successful implementation of S1000D depends on informed planning and strategic decision-making. Contiem provides training and advisory services that empower technical leaders and support the onboarding process as their teams prepare to adopt S1000D for technical publications.

Introduction to S1000D

This eLearning course provides a brief overview of S1000D basics. The focus is on orientation, so technical leaders and support staff can learn important fundamental concepts before they begin onboarding. *Duration: 1.5 hours.*

Topics include:

- Definition and purpose of the S1000D specification
- Structured authoring, data module (DM), and types of DMs
- Data Module Code (DMC) and Information Control Number (ICN)
- DM planning, version control, and asset management
- Standard Numbering System (SNS)
- Business rules and workflow
- Common ways that systems and tools support managing content
- Implementation considerations

S1000D Launchpad Workshop

This expert-led workshop is a hands-on experience for technical leaders, managers, and senior stakeholders who are responsible for preparing their organizations to adopt S1000D. It includes guided activities and discussions that lay the groundwork for strategic decision-making and implementation planning. Participants gain insights from the facilitator's expertise and walk away with clarity about the next steps in their implementation journey.

Prerequisite: Introduction to S1000D. *Duration: 2 days (16 hours divided into two 8-hour sessions).*

Topics include:

- Best practices for S1000D adoption
- Assessing content, business processes, and workflows
- Defining requirements and numbering schemes
- Developing a content migration strategy
- Identifying systems and tools for optimization
- Creating an implementation roadmap
